Features of Aquasoft 2.0

- Management of members and subscribers
- Management and creation of subscription cards in any size, including annual subscription cards
- Preliminary checking of subscriber groups
- Management of multi-level discount cards (VIP cards as well as staff, bronze, silver, gold and platinum cards)
- Automatic calculation of percentage discounts for any articles for sale, with differences factored in for individual VIP card accounts
- Management of credit accounts for VIP cardholders
- The optimised database technology enables work to be carried out in parallel at different workstations
- Easy check-in and checkout of a customer into the system with automatic direct debiting of a visit on the corresponding card
- Fast admission of day visitors at user-defined entrance rates.
- Visitor time check with the option of automatic calculation of additional payments if the initial time paid for is exceeded
- Integration of a personal ID system: instead of a key number, an identification medium is used such as a barcode or transponder chip (Feig Megalock)
- Password log-in or waiter lock with magnetic system
- Professional restaurant/cafe POS system for fast accounting of items and orders with a very user-friendly table number query
- Sale of articles using barcode scanning in the counter area
- The order can be forwarded to the kitchen and bar with a detailed order receipt that includes date, time, name, key number, table number, articles etc. (Epson receipt printer TM-88 1-3)
- You can manage a customer account. Guests pay a total bill when they leave the sauna
- Comprehensive inventory management for 2 POS systems and tariff management
- Management of staff information
- Scheduler for sunbed or massage appointments
- Comprehensive statistics for visitor payments, turnover etc.
- Comprehensive list evaluations of articles, visitors, unfulfilled customer requests etc.
- Assignment of rights to all users
- Internal backup module
- Serial mail function for free mailouts to customers
- and many other
